

Brainstorming & Idea Prioritization Template

Date	05 July 2026
Team ID	
Project Name	Green-Predict-Pro
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Amrutha Gutti	Use ML to recommend the best crop from N, P, K, temperature, humidity, pH and rainfall inputs.	Recommendation	G1
2	Gullapudi Pavani	Provide a soil & climate suitability score for a specific crop chosen by the user.	Suitability	G1
3	Jagan Naga Srinivas V	Build a Flask web app with an interactive form and result page for farmers.	Web App	G1
4	Thota Nagaraju	Perform EDA on the crop dataset using Pandas, Matplotlib and Seaborn to find patterns.	Analytics	G2
5	Vemula Ramu	Compare multiple ML classifiers (Random Forest, Decision Tree, SVM, KNN) and pick the best.	Modeling	G2

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	ML-based crop recommendation from soil & climate parameters	High	High	P1	Yes
2	Crop suitability & environmental assessment module	High	High	P2	Yes
3	Insights & visualization panel for researchers	Medium	Medium	P3	Yes
